Application/Control Number: 10/678,313

Art Unit: 2871

This application is in condition for allowance except for the following formal matters:

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the recited feature "angles formed between phase-retarding axes of the liquid crystal films fixed in nematic or discotic hybrid alignment in the first elliptically polarizing plate and the second elliptically polarizing plate and distinct viewing direction of the liquid crystal layer, are within a range from plus 30 degrees to minus 30 degrees" of claims 1 and 6 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

Application/Control Number: 10/678,313

Art Unit: 2871

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The amendment filed 7/19/2006 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the original disclosure does *not* disclose "the rubbing axis 41 being equal to the distinct viewing direction". It is noted that the original disclosure does disclose "the distinct viewing direction refers to the azimuth direction of a director of liquid crystal molecules at almost the center of the liquid crystal layer" (paragraphs 0021, 0027, 0031 and 0037).

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim 15 is objected to because of the phrase "the twist angle therein being zero degrees". It is suggested to delete "the twist angle therein being zero degrees" for the claim language being clear. As is well-known in the art, when the liquid crystal layer has a *parallel* (homogeneous) alignment, the liquid crystal molecules are *not* twisted.

## Response to Applicant's remarks

It is not agreed with Applicant's remarks that "the rubbing axis 41 being equal to the distinct viewing direction" and this feature is *inherently* disclosed in Applicant's disclosure, as originally filed. It is noted that the phrase "distinct viewing direction" is *not* common in the art. The examiner has made a prior art search and could not find a reference disclosing that "the rubbing axis is equal to the distinct viewing direction".

Application/Control Number: 10/678,313

Art Unit: 2871

If Applicant provides *evidences* showing "the rubbing axis is equal to the distinct viewing direction" is well-known in the art, the objection to the specification and the objection to the drawings will be withdrawn.

Prosecution on the merits is closed in accordance with the practice under *Ex* parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter.

Any inquiry concerning this communication should be directed to Tai Duong at telephone number (571) 272-2291.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
